Dear Visitors,

Visits to our hospital are currently possible again under the following conditions:

- Presentation of a personal identity card / passport / driving licence
  - and possession of an official negative Corona test (evidence with certificate, not older than 24 hours)
  - or evidence of complete vaccination protection (evidence with vaccination card, second vaccine dose at least 14 days ago)
  - or you have recovered from COVID-19 (evidence with a positive PCR test result, at least 28 days and at most 6 months old)

- You have been registered as a visitor – 2 people are permitted for each patient. This information is stored in our IT system and retrieved for every visit.
  - Adult patients are permitted to receive 2 visitors each week (one person per visit).
  - Children and adolescents are permitted to receive 2 visitors each day (one person per visit).

- You must be free of fever and infections (gastrointestinal, respiratory).

- Children under 10 years of age are not permitted as visitors in the hospital.

- Visits are permitted as of the first day of treatment.

- Following a brief screening, you will receive a visitor permit document at our registration offices. Please bring this document with you again on the occasion of your next visit.
RULES OF CONDUCT IN THE HOSPITAL AND PATIENT ROOM

- No more than one visitor is entitled to be present in the patient room. This means that waiting periods may be expected. You and your relative can help us greatly in organisational terms if the visit could be coordinated in advance with other patients sharing the room. This will help you to avoid unnecessary waiting times.

- Please avoid unnecessary walks. We would ask you to please go directly to the ward and register there in the duty room in order to log in and out again.

- Please follow any instructions from hospital staff. They are entitled to limit visits at any time.

- An FFP2 mask or medical face mask must be worn correctly covering the mouth and nose during the entire time in the hospital.

- Please disinfect your hands when entering and exiting the hospital and the patient room.

- Please also avoid bodily contact and maintain a safe distance (min. 1.5 metres) to your relative and other people.

- These rules may be adapted at any time.

We ask for your understanding with regard to these precautionary measures. Their sole purpose is for your own protection and the protection of our patients and staff.

Thank you very much for your support!
